EDUCATION

UNIVERSITY OF STAFFORDSHIRE

BSc (Hons) Computer Games
Design and Programing
2024 - Present

EXETER COLLEGE

→ HNC Esports Production and
Management
→ BTEC Level 3 National Extended
Certificate in Information
Technology
2021 - 2024

SKILLS

→ C ++
→ C#
→ Unity
→ Unreal Engine
→ UI Implementation
→ GitHub
→ Microsoft Office
→ Collaboration
→ Communication
→ Problem Solving
→ Playtesting & Iteration

CERTIFICATION

FIRST AID TRAINED
RYA POWER BOATING LV 2

ABOUT ME

Second-year Computer Games Design and Programming student at University of Staffordshire with experience developing games in Unity and Unreal Engine using C++ and C#. Passionate about gameplay programming, game feel, and creating engaging player experiences. Strong teamwork and communication skills developed through collaborative projects and leadership experience within the Sea Cadets.

WORK EXPERIENCE

INSTRUCTOR - PETTY OFFICER

Sea Cadets Corp (2015 - Present)

- Lead and support teams in structured training environments
- Deliver lessons and practical activities to cadets across different age groups
- Developed communication, teamwork, and leadership skills through mentoring responsibilities
- Adapted to fast-paced and outdoor environments while ensuring participant safety and engagement

PROJECTS

DEADPLATE

Game Design Team Project (2026)

- Contributed as part of the design team for a skill-based cooking game with a dark narrative twist
- Assisted in designing and balancing gameplay minigames to improve player engagement and pacing
- Helped adjust difficulty systems to create a smoother gameplay experience and progression curve
- Collaborated with team members during development and playtesting phases

PROCEDURAL TERRAIN GENERATOR

Unity/C# (2026)

- Developed a procedural terrain generation system using noise maps and randomly generated values
- Generated terrain heightmaps by sampling values between 0 and 1 from procedural noise functions
- Implemented dynamic terrain and mountain generation based on sampled noise values
- Explored procedural generation techniques and terrain shaping systems
